Telephone 1333

We have specimen Dogwoods, both White and Pink, growing in the nursery. See page 27

Introduction ___

1848 - 1939

N 1848, just 91 years ago this spring, Stephen Hoyt, grandfather of our present president, founded this Nursery.

From a modest beginning our business grew until we now have over 600 acres covered with specimen trees and plants of all descriptions. We have always attempted to grow trees of the finest quality, priced fairly.

We wish to thank our thousands of friends for the liberal and ever-increasing patronage which has been bestowed upon us, and we aim to offer still finer trees and better service in the years to come.

Notice to Customers

PLANTING-TIME

The spring season starts as soon as the frost is out of the ground and extends throughout April, May, and June.

Most material is so grown that late planting can be done successfully. Since most of our plant material comes balled and burlapped (B&B), it is possible for us to move plants in late spring, and in early autumn. However, we reserve the right to ball and burlap, at extra charge, those items not so listed, when they are in leaf or in a growing condition.

The fall season starts in August and extends through December, or as long as the ground is open.

Schedule of Balling and Burlapping (B&B) Charges

Deciduous Shrubs,	Deciduous	and Ornamenta	al
Vines, Etc.	'	Trees	
Plant Size Charge			
2 to 3 ft \$0 30	6 to 8 ft. high		
3 to 4 ft 50		20 to 24 in	3 50
4 to 5 ft 60	$\frac{1}{2}$ to $\frac{21}{2}$ -in. cal.	24 to 26 in	5 00
5 to 6 ft 75	$2\frac{1}{2}$ to 3-in. cal.	26 to 30 in	6 00
6 to 8 ft 1 25	3 to 4-in. cal.	30 to 36 in	7 50

The above prices apply to those items in our Catalogue which are not priced Balled & Burlapped (B&B), when Balling is necessary or requested.

LANDSCAPE SERVICE

Our Landscape Department will be glad to be of assistance to you, without charge, in advising you about your plantings. However, if plans and specifications are furnished, a charge will be made to cover these expenses. This charge will be deducted if our Nursery furnishes the plant material.

PRICES

Prices in this list are f.o.b. New Canaan, Conn., and are for our selection only. Plants selected by our customers will be charged for according to their individual value. All quotations offered are subject to prior sale. These prices supersede all others and are subject to change without notice.

DELIVERIES

Deliveries are made free within a radius of 15 miles on scheduled days. Special deliveries and distant deliveries will be charged for at the rate of 20 cents a mile in one direction. Plant material will be delivered to your grounds but will not be carried to planting locations unless previously arranged for at extra charge.

RESERVATIONS

Plants marked in the Nursery for future delivery will be held over for one season only, or six months' time, unless payment is made. Plants are held at the buyer's risk.

PACKING

Packing will be charged for at cost on freight and express shipments.

TERMS

Cash or satisfactory references must accompany all orders, unless the person ordering is known to us.

GUARANTEE

It is our policy to guarantee our nursery products for a full year, and to replace without charge any plant or tree which dies within that time, provided payment is received within 30 days. However, we insist that our material must be properly planted and cared for and that it be planted in a place where there is a reasonable chance of its thriving, otherwise the guarantee is void.

The cost of planting and transportation of replaced trees is borne by the purchaser, and replacement is done

Koster Blue Spruce. See page 10

LARGE SUGAR MAPLE, 45 feet high; diameter of trunk 16 inches. Note symmetrical 12-foot ball of earth and fibrous roots. This tree was planted in 1935 and is thriving today.

Large-Tree Moving

Our Nursery is well equipped for the moving of large trees up to 18 and 20 inches in diameter. For the last thirty-five years we have moved thousands of these trees successfully, and they have been a satisfaction to their owners. Fall or winter is the best time for moving large trees, since it is then possible to do this heavy work more easily and thus more economically.

We are in a position to furnish large trees from our Nursery, or can move trees on your estate. Our representative would be glad to call and quote prices on moving or furnishing.

AMERICAN CEDAR, 30 feet tall; stem diameter 10 inches; diameter of ball 7 feet. This tree was planted for one of our clients in 1936 and is thriving today.

Trees of this size moved quickly and economically with our modern equipment.

AMERICAN ELM, 6 to 7-inch diameter stem; 22 to 25 feet high. We have many trees of this size and larger in the Nursery.

Abies · Fir

Noble trees of majestic proportions are many of the Firs, and, on account of their rapid growth and hardiness, they may be classed among our most useful evergreens. Their habit of growth is pyramidal or conical, and their foliage ranges in color from light green to deep, somber, glaucous hues. They may be used in screens, backgrounds, or as specimens.

Abies concolor. W	Vhite Fir.	50 to	601	ft.

	From Nikko Mountains in Asia. A rapid-growing Fir	with

A large, pyramidal tree, its silver-green foliage blending well

CEDRUS atlantica glauca. Blue Atlas Cedar.

60 to 70 ft.

A very distinctive ornamental tree with rich blue foliage.

Chamaecyparis (Retinospora) · Cypress

Cypress is a large family of evergreens which thrives in various soil-conditions. Their uses are numerous because they vary in both color and size. Some grow into tall trees, while others are dwarf. Use this evergreen as a background for gardens, hedges, house foundations, and in rockeries. It must be used in the sunlight for best results. Most varieties grow rather rapidly.

Chamæcyparis obtusa gracilis. Hinoki Cypress.

12 to 15 ft.

Semi-dwarf with rich green color. Makes an ideal hedge.

Juniperus • Juniper; Cedar The Junipers are a Jarge group of evergroups which grown
The Junipers are a large group of evergreens which grow in almost all parts of this country, as well as in many parts of the world. These plants are used extensively in garden work, due to their varying types and interesting habits of growth, either columnar, bushy, or spreading. All varieties are extremely hardy, have attractive foliage, varying in color from light to dark and even to a bluish green. Some have showy blue berries in the fall. They may be used as individual specimens, for screens, hedges, or in rock-gardens. They grow best in a well-drained soil in full sunshine, and for best results should be fed occasionally to maintain their color and artistic habits of growth.

J. virginiana globosa. Globe Cedar. 3 to 4 ft.
A dwarf globe form of Cedar. Good for rockery use.
$\frac{1\frac{1}{2} \text{ to 2 ft.}}{2 \text{ to } 2\frac{1}{2} \text{ ft.}}$ 3 50 2 to $\frac{2}{2}$ ft
J. virginiana kosteri. Spreading Koster Juniper. 3 to 4 ft.
A low, spreading variety. Pleasing green foliage. Very good in low plantings.
1½ to 2 ft. 2 50 2 to 2½ ft. 3 00 2½ to 3 ft. 4 00
J. chinensis fortunei. Fortune's Juniper. 20 to 25 ft.
A rather informal-growing Cedar. Gray-green foliage. Useful in mixed plantings.
J. virginiana cannarti. Cannart Juniper. 20 to 25 ft.
A very attractive Hybrid Cedar having dark green, bunchy foliage. Bears porcelain-blue fruit in late summer. One of the best upright Junipers.
J. virginiana glauca. Blue Cedar. 20 to 25 ft.
A fine Juniper. Good grouped with other evergreens. Distinctive on account of its blue color.
J. virginiana keteleeri. Keteleer Cedar. 18 to 20 ft.
A rugged, compact, pyramidal Cedar, bearing large light blue berries in the fall. Has very attractive foliage. Always free from disease.
J. virginiana schotti. Schott Juniper. 20 to 25 ft.
Closely resembling our native Cedar, a tall slim tree with blue berries in fall.
Sizes on all the above varieties: Each 3 to 4 ft. \$4 00 4 to 5 ft. 5 00 5 to 6 ft. 6 00 6 to 8 ft. 8 50 8 to 10 ft., specimen 12 00 10 to 12 ft., specimen 15 00

Juniperus chinensis sargenti. See page 8

Picea · Spruce

These rapid-growing evergreens are distinctively pyramidal in habit and thrive best standing in well-drained soil in the open sunshine. They are used as windbreaks, screens, hedges, or as individuals. As a specimen, this conifer is unsurpassed and should be given plenty of room for development, since some varieties grow to great heights and become more attractive with age. They are extremely hardy. Thousands are used every year for Christmas trees.

Picea omorika. Serbian Spruce. 40 to 50 ft.

This tree develops into a tall, narrow specimen. Con	ntrasting
foliage, green on top and blue on bottom of needle.	Each

Pinus • Pine

Most of these well-known evergreens grow rapidly into large, rugged trees. They have attractive foliage of various colors, and are particularly well suited for windbreaks or screens, but they also grow into beautiful specimen trees. Some varieties thrive at the seashore, while others do best at higher elevations. All varieties, however, grow well under exposed or windy conditions and do best in full sunlight. Most Pines enjoy a light, well-drained soil.

Pinus flexilis. Limber Pine. 30 to 40 ft. A beautiful Pine, too little used. Its graceful, gray-blue foliage blends well in all landscaping. 6 to 7 ft. 7 to 8 ft. 8 to 10 ft. 10 to 12 ft. 20 00
P. montana mughus. Mugho Pine. 3 to 4 ft. A very fine low-growing Pine, used successfully in borderwork. One of the best for shore-plantings. Very hardy.
2 to 3-ft. spread, specimen 4 00 3 to 4-ft. spread, specimen 6 00 4 to 5-ft. spread, specimen 10 00

Pseudotsuga · Douglas Fir

This evergreen is a rapid, graceful grower. Its foliage varies from light to dark green, and in some types even to a bluish green. It is perfectly hardy and transplants easily. This conifer thrives in exposed locations and grows well in moist as well as well-drained soils. It is used for wind-breaks, screens, or as a specimen tree; also used extensively for Christmas trees.

Taxus · Yew

The Yews belong to one of the most ancient families of trees on earth and have long been highly valued in England and Japan for their dark green beauty and permanence. All varieties become handsome plants, some low- or dwarf-growing, some faster and more upright, while others grow into large pyramidal-shaped trees. Some types of Yews are better colored than others, therefore it is from these plants of the better varieties that we have grown our Yews.

Due to their varying habits of growth, they may be used in gardens, for hedges, near the house, or as individual specimens anywhere.

Yews are very hardy and some varieties are adorned with beautiful red berries in the late summer or fall. Some of these plants tolerate shade, but most varieties grow best in full sunlight.

Tsuga • Hemlock

Stately grace and dignity characterize the Hemlock, which we consider the most beautiful of the larger North American evergreens. Its attractive dark green foliage weeps gracefully and is tipped with the bright green of new growth during the spring. Hemlocks are hardy and thrive in almost any soil. They tolerate the shade better than other evergreens and are very adaptable, being used for hedges, backgrounds for gardens, or as specimens. They stand shearing or pruning, or may be allowed to grow naturally.

Canadian Hemlock, 3 to 4 feet. Stocky plants of this character make excellent hedges. We have many thousand of this size and larger in our nursery.

Hardy Evergreen Shrubs

The importance of this class of plant material has long been recognized by many garden lovers. Since they are evergreen, they present an attractive appearance, in both summer and winter. They are comparatively slow growers, are easy to keep in bounds, and grow more beautiful with age. All of these varieties grow best in a somewhat acid soil, lightened by plenty of leaf-mold or peat-moss, and some require protected locations for best results. Certain varieties may be used with success in plantings in the shade.

AZALEAS. See pages 24 and 25.

BERBERIS julianæ. Wintergreen Barberry. 5 to 6 ft.

A yellowish green, spiny-leaved shrub with bright yellow flowers followed by purplish fruit. Good autumn color.

Magnolia soulangeana (Saucer Magnolia). See page 28

Block of several hundred European Green Beech (Fagus sylvatica) ranging in height from 15 to 22 feet, and 5 to 7 inches diameter stem. All specimen plants.

Possibly the most attractive features in many of our New England towns are the large shade and ornamental trees. It is absolutely necessary to include deciduous trees in your home or street plantings, since no other trees can equal in foliage or growing characteristics those produced by this group.

It is important to plant some of these trees each year, since it takes from ten to twenty-five years to produce a good-sized specimen. Plant medium-sized trees and they

will grow rapidly into lofty specimens.

will grow rapidly into lofty specimens.
ASH, Mountain. Sorbus aucuparia. 25 to 30 ft. Well known in Europe for its great clusters of orange-red fruit. The robins in this country love these berries. 6 to 8 ft., B&B. 85 00 8 to 10 ft., B&B. 7 50 10 to 12 ft., B&B. 10 00 12 to 14 ft., B&B. 12 00

8 to 10 ft., B&B
BIRCH, Canoe. Betula papyrifera. 80 to 90 ft. Originates in the Adirondacks. Characteristic white bark
is not evident until the tree is slightly older than other varieties of White Birch. A long-lived tree.
5 to 6 ft
8 to 10 ft 6 00
10 to 12 ft
BIRCH, Cut-leaf Weeping. Betula alba laciniata. 30 to 40 ft. Deeply cut green leaves on white branches which droop
gracefully to the ground like a large fountain.
8 to 10 ft., B&B
12 to 15 ft., B&B
BIRCH, European White. Betula alba. 40 to 50 ft.
Creamy white bark. Good as a background against evergreens; also used in clumps.
6 to 8 ft
8 to 10 ft
ELM, American. <i>Ulmus americana</i> . 75 to 100 ft. A giant at once majestic and graceful. At home everywhere
in northeastern United States. This noble tree is an institution in our New England towns.
The disease which threatened the Elm has been checked, and
we have every reason to believe will be wiped out. We are selling hundreds of these trees each year and are propagating
thousands for future sale, as we believe them to be the finest of all shade trees.

Weeping Willow (Salix babylonica). See page 41

Specimen, Viburnum sieboldi. See page 53

Included among the Flowering Shrubs are those old favorites well known to all, as well as some worthy new varieties. We offer shrubs in two grades, a regular or standard grade, and our specimen grade.

Our standard shrubs are good, sturdy, well-grown plants

which will thrive and grow rapidly into fine bushes.

The specimen shrubs are larger, well-developed plants which have been spaced and pruned in the nursery, and when used in plantings, give an immediate landscape effect.

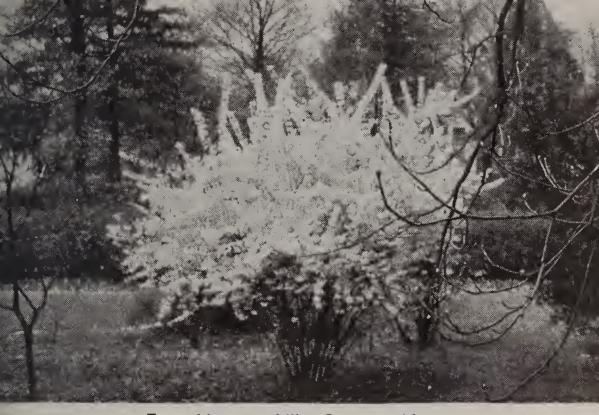

ABELIA grandiflora. Glossy Abelia. 5 to 6 ft.

A dainty evergreen shrub bearing little bell-shaped pink flowers. Blooms throughout the summer until frost. Excellent for garden plantings. May be cut back every spring. Each 1½ to 2 ft., B&B......\$1 50

ARONIA arbutifolia. Red Chokeberry. 8 to 10 ft. White flowers tinged with red in early spring. Outstanding red fruit in fall. Each 1½ to 2 ft
2 to 3 ft
A. melanocarpa. Black Chokeberry. 8 to 10 ft. White flowers. Black fruit in fall. 2 to 3 ft
BENZOIN æstivale (Lindera Benzoin). Spice Bush. 6 to 8 ft.
Clusters of yellow flowers in April. Red berries in September, relished by birds. Good for moist ground. 2 to 3 ft
2 (0 3 10 1 00
BERBERIS thunbergi. Japanese Barberry. 5 to 7 ft. Small green leaves. Red berries in fall, which stay nearly all winter. Used extensively for hedging and ground-cover for rough banks.
$1\frac{1}{2}$ to 2 ft
B. thunbergi atropurpurea. Redleaf Japanese Barberry. 5 to 6 ft.
Similar to Thunbergi in habit. Bright red foliage in spring, reddish purple in summer and scarlet in fall. 15 to 18 in
BUDDLEIA farquhari. Farquhar Butterfly Bush. 8 to 10 ft.
Improved variety. Blooms all summer, with lilac-colored flowers. Attracts butterflies. 3-yr
B., Ile de France. Hybrid Butterfly Bush.
Clear rosy purple fragrant flowers during summer. A better variety. 3-yr
J-y1
CALLICARPA purpurea. Chinese Beauty Berry. 4 to 5 ft.
Dense green foliage in summer. Bunches of mauve berries along its willowy branches in the fall. 2 to 3 ft
CALYCANTHUS floridus. Sweet Shrub. 8 to 9 ft.
Sweet-scented brown bud-like flowers in June. Good for mass plantings.
2 to 3 ft
CEPHALANTHUS occidentalis. Buttonbush. 6 to 10 ft. Creamy white flowers from July to September.
2 to 3 ft
CLETHRA alnifolia. Sweet Pepperbush. 7 to 8 ft. White flowers during June and July. Thrives in damp ground as well as upland.
2 to 3 ft
CORNUS alba sibirica. Coral Dogwood. 8 to 10 ft. Dogwood leaf. Coral bark gives striking effect in winter.
3 to 4 ft

Cornus amomum. Silky Dogwood. 6 to 8 ft.
Light red bark. Porcelain-blue berries in the fall.

Small, pure white, double, bud-like flowers in early May. Upright grower.
3 to 4 ft
S. thunbergi. Thunberg's Spirea. 6 to 7 ft.
Arching branches covered with tiny, single, snow-white flowers in very early spring. The feathery green foliage turns orange and scarlet in autumn.
2 to 3 ft. 75 3 to 4 ft. 1 00 3 to 4 ft., specimen, B&B 2 00 4 to 5 ft., specimen, B&B 2 50
S. trichocarpa. Korean Spirea. 6 to 7 ft.
White clusters of flowers during late May. Similar growth to S. vanbouttei.
3 to 4 ft
S. vanhouttei. Vanhoutte Spirea. 6 to 7 ft.
Commonly called Bridal Wreath. Showy, arching sprays of clustering white flowers in late May. An aristocrat of flowering shrubs.
3 to 4 ft
STEPHANANDRA flexuosa. Cutleaf Stephanandra. 5 to 6 ft. Compact grower. Has reddish purple color in autumn.
2 to 3 ft
SYMPHORICARPOS racemosus. Snowberry. 4 to 5 ft.
Known for its large white berries in September which weigh down the slender branches. Fruit clings until frost. Very hardy. Suitable for most soil-conditions. Stands shade.
2 to 3 ft

Flowers of Rhodotypos kerrioides. See page 50

Viburnum carlesi specimen (Fragrant Viburnum)
Note abundance of blossoms.

Symphoricarpos vulgaris. Coralberry. 4 to 5 ft.
Bears small coral fruit which clings from fall till early spring. Very hardy. 2 to 3 ft. 3 to 4 ft. 1 00
SYMPLOCOS paniculata. Asiatic Sweetleaf. 4 to 5 ft.
White flowers in spring. Heavily laden with turquoise-blue berries in early autumn.
2 to 3 ft., B&B
SYRINGA. All Lilacs listed on pages 55 to 57.
VACCINIUM corymbosum. Highbush Blueberry. 5 to 6 ft.
This native shrub has pink flowers followed by edible blue- black berries. Its leaves turn brilliant red in the fall. Does well in acid soil and needs plenty of moisture.
2 to 3 ft., B&B
VIBURNUM americanum. American Cranberry. 10 to 12 ft.
A handsome shrub growing from 10 to 12 feet high, bearing large clusters of berries which start turning a deep red about the first of August and hang on all winter.
3 to 4 ft. 1 00 4 to 5 ft., specimen, B&B 2 50 5 to 6 ft., specimen, B&B 3 00 6 to 8 ft., specimen, B&B 4 00
V. carlesi. Fragrant Viburnum. 4 to 5 ft.
This beautiful semi-dwarf shrub starts blooming in May. Flowers are soft pink and very fragrant. Good in garden and border plantings.
1½ to 2 ft., specimen, B&B

3
Viburnum cassinoides. Withe-Rod. 6 to 8 ft.
A fine type of native shrub. Has creamy white blossoms followed by fruit clusters turning various colors. Its leaves are
brilliant red in the fall. 2 to 3 ft., specimen, B&B\$1 50
3 to 4 ft., specimen, B&B
V. dentatum. Arrow-wood. 10 to 15 ft.
A tall-growing type flowering in May and June. Bears blue- black berries in profusion. Its leaves turn purple and red. Withstands shade; also wet places.
2 to 3 ft
5 to 6 ft., specimen, B&B
6 to 7 ft., specimen, B&B
8 to 10 ft., specimen, B&B
V. dilatatum. Linden Viburnum. 8 to 10 ft. A Chinese variety with white flowers in May and June. Its
leaves turn a bright autumn red and its small scarlet berries hang on all winter. One of the best Viburnums. 2 to 3 ft., B&B
3 to 4 ft., specimen, B&B
V. lentago. Nannyberry. 15 to 20 ft. A tree-like shrub, rather slender in growth. White flowers
in May. Leaves turn a reddish color in fall. Has large blue-black fruit. Grows well in damp places. 4 to 5 ft
4 to 5 ft., specimen, B&B
5 to 6 ft., specimen, B&B
7 to 8 ft., specimen, B&B
V. molle. Kentucky Viburnum. 10 to 12 ft.
A western variety. Grows 10 to 12 feet high. Very hardy.
Similar to V. dentatum. 2 to 3 ft., B&B
3 to 4 ft., B&B
The European Cranberry. A very good bush bearing quantities of large clusters of glossy red berries. Good foliage.
3 to 4 ft 1 00
4 to 5 ft., specimen, B&B
6 to 8 ft., specimen, B&B
Bears snow-white clusters of ball-like flowers in late May.
Not as good as the Japanese variety. Needs a well-drained, sunny spot.
5 to 6 ft., specimen, B&B
V. prunifolium. Black Haw. 10 to 12 ft. A slow-growing, round-headed shrub, bearing pure white
flowers followed by pink fruit turning to blue-black. Attractive in winter.
2 to 3 ft., B&B
V. rhytidophyllum. Leatherleaf Viburnum. 8 to 10 ft.
A bushy evergreen shrub holding its leaves all winter and bearing striking red berries. 2 to 3 ft., specimen, B&B
3 to 4 ft., specimen, B&B
V. sieboldi. Siebold Viburnum. 10 to 12 ft. Rapid growing. Large, dark green leaves. Creamy white
flowers, followed by fruit which starts green, turning to pink and then black. Striking in appearance.
3 to 4 ft., specimen, B&B
5 to 6 ft., specimen, B&B
52

Viburnum tomentosum. Single Japanese Snowball. 8 to 10 ft. This superb shrub has a tree-like habit of growth, producing its spreading branches in layers. In June, these horizontal
limbs are covered with wheel-like clusters of dazzling white flowers.
3 to 4 ft. \$1 00 4 to 5 ft. 1 25 4 to 5 ft., specimen, B&B 2 50 5 to 6 ft. 1 50 5 to 6 ft., specimen, B&B 3 00 8 to 9 ft., specimen, B&B 5 00
V. tomentosum plicatum. Double Japanese Snowball. 7 to 8 ft.
These happy-go-lucky shrubs produce attractive snowball-like flowers in late May. 3 to 4 ft
VITEX agnus-castus. Lilac Chaste Tree. 5 to 6 ft. Lavender flowers in September, offset by star-like gray-green foliage. Requires sunlight.
2 to 3 ft
WEIGELA candida. White Weigela. 8 to 10 ft. Cream-white flowers in early June, nearly outnumbering its young foliage. Rapid grower.
2 to 3 ft
W., Eva Rathke. Red-flowering Weigela. 4 to 5 ft. Dwarf-growing plant; dark red flowers. 2 to 3 ft
W. floribunda. Crimson Weigela. 6 to 8 ft.
Large-growing, profuse bloomer in early June. 4 to 5 ft. 75 5 to 6 ft. 1 00 5 to 6 ft., specimen, B&B 2 50 6 to 7 ft., specimen, B&B 3 00 7 to 8 ft., specimen, B&B 3 50
W. hendersoni. Crimson Weigela. 6 to 8 ft. Large, abundant bloomer in late May and June. 4 to 5 ft
5 to 6 ft
W. hybrida nana variegata. Variegated-leaf Weigela. 6 to 8 ft. Fine rosy pink flowers surrounded by green and yellow
striped leaves in late May and June. This two-tone leaf adds beauty to any mass planting of shrubs. Semi-dwarf. 4 to 5 ft., specimen, B&B
6 to 8 ft., specimen, B&B
W. rosea. Pink and White Weigela. 6 to 8 ft. Good color and dwarf growth give this plant an advantage. Wonderful for hedge plantings.
3 to 4 ft
W. vanhouttei. Red Weigela. 10 to 12 ft. Tall-growing, red-flowering Weigela. Very hardy. Mixes well with other shrubs.
5 to 6 ft., specimen, B&B

Specimen, Double Lilac

Syringa · Lilacs

Spring is at its height when the Lilacs are in flower. Of the many flowering shrubs, the Lilac is surely the most reliable, lasts longer, and annually bears the handsomest flowers. Lilacs are hardy, thrive almost anywhere, and

have very attractive foliage.

The Hybrid varieties are the most popular with their large, single or double flower-heads. They are equally as fragrant as the old-fashioned type and have exactly the same growing characteristics. Our Hybrids are all grown on Lilac roots, a necessity for proper development of the plant. We believe these plants the most worthy of all flowering shrubs. Lilacs want a sweet soil and blossom best when in full sunshine.

All Hybrid Lilacs are balled and burlapped

Hardy Vines
ACTINIDIA arguta. Bower Actinidia.
A vine which will climb 20 to 30 feet. Good for trellises, walls, and tree trunks. It has handsome foliage. White flowers followed by clusters of greenish fruits. 3-yr., field-grown
AKEBIA quinata. Five-leaf Vine.
A dainty, beautiful vine with curious purple flowers borne in May. It is almost an evergreen. 3-yr., field-grown
AMPELOPSIS heterophylla. Porcelain Vine.
So named on account of its turquoise-blue berries. Its leaves, somewhat grape-like in form, turn a fine autumn shade. 3-yr
A. lowi. Geranium Creeper.
A dwarf type of Boston Ivy. Clings to smooth surfaces. Colors in the fall like Boston Ivy. 2-yr
A. quinquefolia. Virginia Creeper; Woodbine.
Hardy, fast-growing. A five-leaved Ivy, crimson in fall. 2-yr., field-grown
A. tricuspidata veitchi. Japanese or Boston Ivy.
This Ampelopsis will cling to stone and wood. It is a dense grower. Its leaves turn a brilliant color in fall. 2-yr., field-grown
ARISTOLOCHIA sipho. Dutchman's Pipe.
A fast-growing, broad-leaved vine with purple pipe-shaped flowers in July. 3-yr
BIGNONIA, Mme. Gallen.
Large orange-scarlet flowers in August and September.
2-yr. 1 00 3-yr., field-grown 1 50
B. radicans. Trumpet Creeper.
A self-clinging vine with scarlet flowers. 3-yr., field-grown
CELASTRUS scandens. Bittersweet.
The native Bittersweet. Drooping clusters of orange and scarlet berries which are showy after the leaves fall. Good for covering stone walls or barren landscape; also used for house decorations.
3-yr., field-grown
CLEMATIS paniculata. Small White-flowered Clematis. 3-yr., field-grown
J-VI., IICIQ-210WII

Hardy Vines

EUONYMUS colorata.
Brilliant red-tinted foliage in the autumn. Makes a good ground-cover. 2-yr\$0 50
3-yr., field-grown
E. radicans. Winter Creeper. Self-clinging. Its small pointed leaves make a dense covering for almost any type of wall. Very hardy.
2-yr. 50 3-yr., field-grown 75
E. radicans carrierei. Glossy Winter Creeper.
Large shiny leaves. Good grower. Red fruit. Fine ground-cover; also good wall-vine. 2-yr. 50
E. vegetus. Big-leaf Winter Creeper.
Called Evergreen Bittersweet. Round leaves of dull green color. Does well in any position. A self-clinging vine. Has fine orange-colored fruit. 3-yr., field-grown
HEDERA baltica. Hardy English Ivy.
Very much like English Ivy only smaller leaved. Very hardy. Clings tightly. Should be better known. 3 to 5 stems per plant, 12 to 18 in., in 3-in. pots 75
H. helix. English Ivy.
Happily located, this is a very desirable vine. Has good dark green foliage and is long-lived.
8 to 12 stems per plant, 3 to 3½ ft., in 4-in. pots \$7.50 per 10; \$60 per 100 1 00
HYDRANGEA petiolaris. Climbing Hydrangea.
Good for a wall-cover or on stone buildings. Flowers fragrant, white, blooming in early summer. Does well in exposed spots. 4-yr., potted
LONICERA japonica halliana. Hall's Japanese Honey-
suckle.
Almost evergreen. Flowers yellow and white; very sweet. Used as a ground-cover. Is an old favorite on trellises. 2-yr., field-grown
POLYGONUM auberti. Silver Lace Vine.
Known as Chinese Fleece Vine. Has been known to grow 25 to 30 feet in one season. Flowers are fleecy white. Will grow in any location. 2-yr., field-grown
Wisteria
A very strong grower. It has attractive pale green foliage and, early in summer, a great profusion of flowers in long, pendulous clusters. Our plants were grafted from selected, large-flowering vines and are guaranteed to bloom. We offer Wisteria plants in tubs which may be moved at any time during the season with perfect safety.
Wisteria sinensis. Blue Wisteria.
3-yr. 1 50 8-ft. staked vines in tubs. 5 00 8-ft. heavy staked vines in tubs. 7 50
W. sinensis alba. White Wisteria. 2-yr
W. sinensis. Blue Tree or Standard Wisteria.
3-ft. stems in tubs

Bearing-size Apple Tree. 7 to 8-inch diameter stem, height 15 feet, spread 15 to 18 feet. Photographed October, 1937. Prices on application.

Fruit Department

Apple Trees

Apple trees in the ages from 2 to 12 years are listed below. Some of these trees have reached bearing size and are large enough to be planted for purely landscape effects, as well as for fruit. They have been transplanted apart in the nursery

and properly pruned, so that a well-grown head will develop. Besides the trees offered here, we offer heavy specimen bearing trees up to 10 inches in diameter, 15 to 18 feet high with 15 to 25-foot top-spread. These will be priced on application.

Apples, Standard

 $\frac{3}{4}$ - to 1-in. caliper, 6 to 7 ft. high, \$1.50 each $1\frac{1}{2}$ to $1\frac{3}{4}$ -in. caliper, 6 to 8 ft. high, \$3.50 each $1\frac{3}{4}$ to 2-in. caliper, 6 to 8 ft. high, \$5 to \$8 each 2 to 4-in. caliper, 8 to 10 ft. high, \$8 to \$35 each

SUMMER VARIETIES

Red Astrachan. Flesh, tinged with red. Yellow Transparent. Pale yellow.

AUTUMN VARIETIES Cortlandt. Dark red.

Duchess of Oldenburg. Large; streaked with yellow and red. Fall Pippin. Tender; juicy. Yellow-green. Gravenstein. Striped red. High flavor.

McIntosh Red. Delicious; juicy.

Wealthy. Dark red.

WINTER VARIETIES

Baldwin. Large; dark red. Delicious. Red; juicy. Galleon Beauty. Large; red.
